Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claims 3 and 12 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 12 depending another multiple dependent claim 10 is not proper. Claim 3 deepens on claim 1 and 2 is also improper multiple dependent claim See MPEP § 608.01(n). Accordingly, the claims 3 and 12 are not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4 and 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sapp (4,934,390).

Sapp discloses a method and apparatus for cleaning refrigerant equipment comprising a chemical substance tank 33 which is filled with chemical substance used to eliminate the clogging in the refrigeration cycle (for the refrigeration apparatus 15 also see Fig.2 for refrigeration cycle) where the refrigeration fluid circulates, a pressurized

gas tube area which provides pressurized gas 30 to the chemical substance tank 33 and a collection tank 38 where the cleansing chemical substance completed its cycle is collected. Sapp discloses the invention substantially as claimed as stated above including pressurized gas tube. The examiner considers the gas filled area 30 of tank 33 as pressurized gas tube. Alternatively, it is an obvious choice to one having ordinary skill in the art to choose external or internal gas supply to force drive the liquid cleansing substance to the object to clean since there is no criticality or unexpected result from it.

Claims 5-8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sapp. The choosing supplied gases (carrier gas) from so many variant and also known in the art is also obvious choice of an ordinary skill in the art since there is no criticality or unexpected result from it.

Allowable Subject Matter

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad M. Ali whose telephone number is 571-272-4806. The examiner can normally be reached on maxiflex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on 571-272-4808. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
